

DB/C Newsletter

January 2007

News and Comment

Windows Vista will finally be released to the general public on January 30th. It's been a long process for Microsoft. It would be great if this new release of Windows is an advance in stability, ease of use, performance, etc. In a future newsletter we'll provide a review of what we learn about Vista.

We hope to have DB/C DX 15 ready for early testing in the next month or two. If you are interested in helping with the testing process, send us an email at support@dbcsoftware.com.

I will be attending EclipseCon, the annual Eclipse developers conference, from March 6-8 in San Jose. Be sure to make contact with me if you will be attending also. You can find out about EclipseCon at www.eclipsecon.org.
